

I have been contacted by 1-954-382-1736 Priority Health and have asked them twice to remove me from their calling list. I have been hung up on each time and when I have called back to speak to a supervisor I was told there were no supervisors there. I told them to take me off of the list the third time and the woman I was speaking to replied "Don't raise your voice at me bitch" and hung up again. I don't understand the hostility or the unprofessionality towards the public, especially after they had contacted me first. I thought I was pretty calm until the third straw.
